

Feeling cramped by your EST2 fire alarm system?

Time to upgrade.

Make a Quantum Leap...

See what's possible now.

Take the plunge.

Migrate from...	Migrate to...
EST2 Basic Control	iO series control panels and R-Series remote annunciators
EST2 Audio Systems	EST3 or EST3X control panels
EST2 Network Systems	EST3 or EST3X control panels

Simple, economical swap-out options

EDWARDS offers direct replacements for EST2 systems with several upgrade options that merely require a change of control panels and the reconnection of field wiring — in most cases additional equipment or additional wiring is not needed!

- **Use existing detectors and modules:** Upgrade systems take full advantage of advanced *Signature Series*® detection technology found in EST2 installations. No re-wiring or associated equipment costs required.
- **Keep your signals:** EDWARDS upgrade notification appliance circuits include our built-in synchronization protocol to keep your existing Genesis signals code compliant and operating at peak efficiency.
- **Up and running in no time:** With powerful local and remote programming functions your new life safety system will come on-line quickly and with minimum disruption, yet the benefits of its advanced technology will protect your building occupants and save money for years to come.

Leaps and bounds ahead of your current fire alarm system...

EDWARDS upgrade systems represent life safety technology at its best. Featuring an impressive lineup of cost-saving fire alarm control technology, these reliable systems are built for efficiency, and incorporate some of the most advanced features and options available today...

- **Signature Series** innovation combines smoke and CO detection in a single device.
- **Integrated audio** ensures a seamless move from your current voice evacuation setup to a fully updated one.
- **Unsurpassed connectivity** with advanced system networking combined with the scalability of Ethernet communications and the speed and efficiency of fiber optic data transmission.
- **Ground Fault Detection** keeps service calls short and sweet.
- **Voltage Boost™** technology delivers consistent voltage — even at low battery power.
- **Simple Programming** via modem or Ethernet port makes the most efficient use of time and resources to save money now and years into the future.
