

CO Monitoring

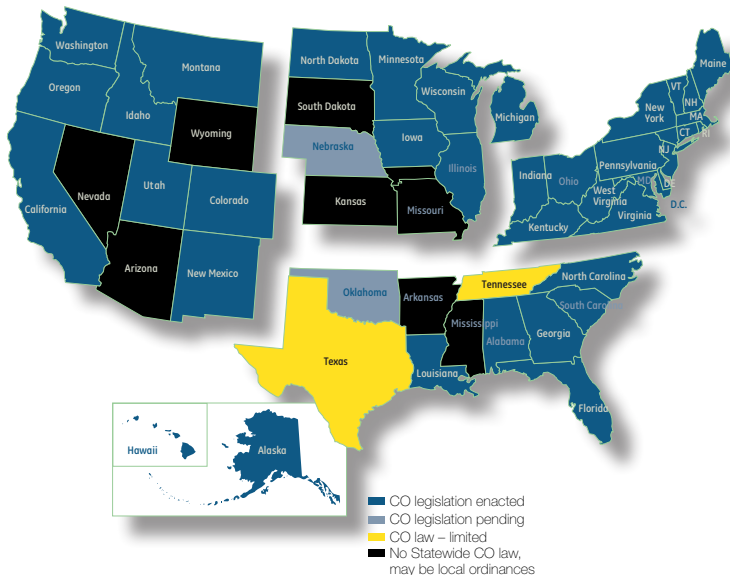

With modular carbon monoxide sensors, Signature Series detectors pull double-duty, continually monitoring the environment for signs of smoke — as well as its invisible yet deadly companion, carbon monoxide. Independent fire and CO life safety response provides the correct event report, while its modular CO sensor ensures cost-effective, code-compliant end-of-life replacement.

More than half of the U.S. population lives in states requiring the installation of CO detectors in some commercial occupancies because carbon monoxide is the leading cause of poisoning deaths in America. EDWARDS Signature Series life safety devices combine smoke and CO detection in one elegant solution.

Thanks to independently programmable smoke and CO event responses, I can meet code and reduce installation costs — all with one device!

Carbon Monoxide Detection Laws

Monitored CO detection is available on select EDWARDS life safety systems. Ask your EDWARDS Strategic Partner how you can ensure your facility benefits from this cost-saving technology.

EDWARDS Strategic Partners:

Innovation, leadership, and a rich tradition of excellence...

Whether EDWARDS life safety systems are protecting the lives and livelihoods of the people who make businesses run, or the lives entrusted to the care of public institutions; whether they're charged with protecting the guests of the world's finest hotels, or preserving irreplaceable artifacts that bring history to life; EDWARDS stands alone as the brand closely associated with some of the most important and far-reaching developments in the life safety industry today.

Our strength is in our Strategic Partners — the people and organizations we entrust with the technology that has charted the course of life safety protection for decades. Strategic Partners are not middlemen or go-betweens. They are independent contractors who add value to the EDWARDS life safety solution. As insiders, they enjoy exclusive access to products, custom design innovations, and factory training. Yet as successful independent contractors, they are adept at ensuring that each submittal is strong and competitive, and that each bid is locally relevant to your installation. As local businesses they not only have to earn your trust — they have to keep it.

Together these strengths set EDWARDS installations apart, and have earned this brand a special place among life safety and security solutions available today. Perhaps that's why many of the world's most cherished landmarks are protected by EDWARDS products. From the Bibliotheca Alexandrina Museum in Egypt, to the modern-day sphinx at the Luxor Hotel in Las Vegas, professionals who design, own and occupy the world's most impressive structures have chosen the EDWARDS solution.
